

Circuit Cellar Magazine
Index of Contents:
Issue 1 (Jan. 1988) – Issue 250 (May 2011)

ISSUE 1

Jan/Feb 1988

Theme: INSIDE THE BOX STILL COUNTS

Inside the Box Still Counts, by Steve Ciarcia, 1.

Visible Ink—Letters to the INK Research Staff, 2.

The Circuit Cellar Motion-Triggered Video Camera Multiplexer, by Steve Ciarcia, 5-10.

Ink Spot—Guest Editorial, 11.

High Security on a Budget—Build a Video Handscanner/Identifier, by Ed Nisley, 13-21.

ConnectTime—Excerpts from the Circuit Cellar INK BBS, conducted by Ken Davidson, 22.

The Home Satellite Weather Center—Part I: RGBI to NTSC Converter, by Mark Voorhees, 29-34.

Firmware Furnace, by Ed Nisley, 35-39.

ISSUE 2

Mar/Apr 1988

Theme: TECHIES

The Core Audience, by Steve Ciarcia, 1.

Reader's Ink—Letters to the Editor, 2.

Circuit Cellar Neighborhood Strategic Defense Initiative—The Ballistics Dynamics of Plastic Soda Bottles, by Steve Ciarcia & Ed Nisley, 5-16.

Visible Ink—Letters to the Circuit Cellar INK Research Staff, 17.

INK Spot—Guest Editorial, Leonardo the Techie, by Phil Lemmons, 21.

The Home Satellite Weather Center—Part 2: NTSC Encoder Alignment and System Overview, by Mark Voorhees, 23-27.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 28.

Firmware Furnace—Digitizing Infrared Signals, by Ed Nisley, 32-42.

Personal-Computer-Based Instrumentation—Build a 4-Channel Temperature Logging and Data Reduction System, by Tom Riley, 43-48.

ISSUE 3

May/June 1988

Theme: CONTROL MAGIC

Control Magic, by Steve Ciarcia, 1.

Readers Ink—Letter to the Editor, 2.

Power-Line-Based Computer Control—The X-10 PL513 Power Line Interface Module, by Ken Davidson, 4-13.

Visible Ink—Letters to the Circuit Cellar INK Research Staff, 15.

The Home Satellite Weather Center—Part 3: Weather Databases and System Software Overview, by Mark Voorhees, 19-26.

Ink Spot—Guest Editorial, The Information Free-For-All, by Mark Dahmke, 27.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 28.

Firmware Furnace—Video Signal Timing and Real-Time Interrupt Control, by Ed Nisley, 34-41.

SoftUART—Software Emulation of Full-Duplex Serial Channels, by Bill Curlew, 42-48.

ISSUE 4

July/Aug 1988

Theme: STEPPER MOTORS

The Market-Driven Myth, by Steve Ciarcia, 1.

Reader's Ink—Letter to the Editor, 2.

Circuit Cellar Stepper Motor Scanning Sonar Sensor—A Look at the Logic and Control of Stepper Motors, by Steve Ciarcia and Ed Nisley, 5-17.

Visible Ink—Letters to the Circuit Cellar INK Research Staff, 18.

The Satellite Home Weather Center—Part 4: Dial-Up Databases and a 68000 Peripheral Processor, by Mark Voorhees, 21-27.

Ink Spot—Guest Editorial, Bigger is not necessarily better, by Ezra Shapiro, 29.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 30.

Circuit Cellar Neighborhood Strategic Defence Initiative—Building the Bottle Launcher and Gantry, by Ed Nisley, 36-37.

Firmware Furnace—Using the IBM PC Joystick Port, by Ed Nisley, 38-46.

Stepping Out—A Robot Arm that Demonstrates Microprocessor Control of Stepper Motors, by Tim McDonough & Dennis Grim, 49-56.

ISSUE 5

Sept/Oct 1988

Theme: REMOTE VIDEO SURVEILLANCE

Editor's Ink—Not the Same Old Song, by Curtis Franklin, Jr., 1.

Reader's Ink—Letters to the Editor, 2.

ROVER—Remotely Operated Video-based Electronic Reconnaissance, by Steve Ciarcia and Ken Davidson, 4-13.

Visible Ink—Letters to the CCINK Research Staff, 14.

The Satellite Home Weather Center—Part 5: Focus on the MC68000 Peripheral Controller, by Mark Voorhees, 16-23.

From the Bench—RS-232 Economic Trade-offs, by Jeff Bachiochi, 24-25.

10-MHz/8-bit Digitizing Board for the IBM PC—An Affordable Digital Oscilloscope on a Plug-in Board, by Russell Lindgren, 26-33.

The X-10 TW523 Two-Way Power Line Interface—A Step Toward Closed-loop Power Line Control, by Ken Davidson, 34-35.

The DDT-51 Lives—Fixes, Updates, and Future Plans for the Low-Cost 8051 Development System, by the Ink Research Staff, 38-39.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 40.

Firmware Furnace—Precision Pulses: Carrier-Current Transmission Timing, by Ed Nisley, 46-51.

Steve's Own Ink—Back Here, by Steve Ciarcia, 52.

Update: Additional information to previous articles

ISSUE 6

Nov/Dec 1988

Theme: DATA ACQUISITION

Editor's INK—An Active and Growing Industry, by Curtis Franklin, Jr., 2.

Reader's INK—Letters to the Editor, 3.

ROVER: Remotely Operated Video-based Electronic Reconnaissance—Part 2: The Software, by Steve Ciarcia & Ken Davidson, 6.

Visible INK—Letters to INK Research Staff, 16.

The Satellite Home Weather Center —Part 6: Adding Serial and Parallel Ports to the Peripheral Controller, by Mark Voorhees, 20.

From the Bench—Fiber Optics: Your Link to the Future, by Jeff Bachiochi, 28.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 31.

ImageWise/PC—Part 1: The Digitizing Continues, Video Basics, by Ed Nisley, 36.

Build a Remote Analog Data Logger—Part 1: A simple 6809-Based Data Acquisition System, by R.W. Meister, 45.

Firmware Furnace—DDT-51 Revealed, by Ed Nisley, 51.

Steve's Own INK—A Gathering of Eagles, by Steve Ciarcia, 56.

ISSUE 7

Jan/Feb 1989

Theme: COMPUTING IN REAL-TIME

Editor's INK—The Revolution Continues, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 5.

ImageWise/PC —The Digitizing Continues: Part 2: The Hardware, by Ed Nisley, 8.

Visible INK—Letters to the CCINK Research Staff, 20.

Build a Remote Analog Data Logger—Part 2: The Software, by R.W. Meister, 22.

INK Spot—Guest Editorial—A Call for Dedication, by Ezra Shapiro, 34.

The Home Satellite Weather Center—Part 7: Finishing the Firmware for 68000 Peripheral Processor, by Mark Voorhees, 36.

From the Bench—AC Power Line Transmission, by Jeff Bachiochi, 42.

Writing a Real-Time Operating System—Part 1: A Multitasking Event Scheduler for the HD64180, by Jack Ganssle, 45.

Firmware Furnace—Real Numbers: Number Crunching for the 8751, by Ed Nisley, 52.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 59.

Steve's Own INK—First INK Reader Survey, by Steve Ciarcia, 64.

ISSUE 8

April/May 1989

Theme: CREATIVE COMPUTING

Editor's Ink—The Whole Story, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 5.

Switching Power Supplies—Efficient Power for Embedded Control Systems, by Steve Ciarcia, 10.

Visible INK—Letters to the Editor, 20.

Product Reviews—The Next Generation: Circuit Cellar INK sells out and enjoys it! Supercharged Worry Munchers: Circuit Cellar INK looks at four diverse applications solutions. 22. (This is a humorous April Fool's special section.)

Writing a Real-Time Operating System—Part 2: Memory Management and Applications for the HD64180, by Jack Ganssle, 30.

ImageWise/PC—The Digitizing Continues: Part 3: Topping It Off with Software, by Ed Nisley, 34

From The Bench—Creating a Network-based Embedded Controller, by Jeff Bachiochi, 46.

HD647180X—A New 8-Bit Microcontroller: Embedded Controllers Get Respect, by Tom Cantrell, 52

Firmware Furnace—The True Secrets of Working with LCDs, by Ed Nisley, 56.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 67.

Steve's Own INK—Smile When You Call Me That, by Steve Ciarcia, 72.

ISSUE 9

June/July 1989

Theme: INTELLIGENT APPLICATIONS

Editor's INK—Working Smarter, Not Faster, by Curtis Franklin, Jr., 1.

Reader's Ink—Letters to the Editor, 5.

Visible INK—Letters to the INK Research Staff, 8.

The X-10 IR543 Infrared Gateway/Controller—Control Your Lights with Your Trainable IR Remote, by Ken Davidson, 11.

A Neural Network Approach to Artificial Intelligence—Using a Neural Network for Dealing with Real-World Data, by Christopher Ciarcia, 18.

The Adaline Learning Neuron—A One-Node Net for Computer Learning, by Scott Farley, 28.

An Intelligent SCSI Data Acquisition System for the Apple Macintosh—Part 1: Building the Hardware, by John Eng, 36.

From the Bench—The Invisible Net, by Jeff Bachiochi, 44.

Silicon Update—The Waferscale Integration PAC1000: Microcontroller, RISC, or PLD?, by Tom Cantrell, 50.

Software by Design—Computing CRCs in Parallel, by Jack Ganssle, 55.

Firmware Furnace—From Fixed Point to Floating Point and Back Again: Writhing Reals, by Ed Nisley, 60.

UPDATE: Build an 87xx Programming Adapter, by Jeff Bachiochi, 69.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 74.

Steve's Own INK—The Good Old Ways, by Steve Ciarcia, 80.

ISSUE 10

Aug/Sept 1989

Theme: THE ELECTRONIC HOUSE

Editor's INK—CEBus on the Ragged Edge, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 5.

NEW Product News, 8.

Visible INK—Letters to the INK Research Staff, 12.

An Intelligent SCSI Data Acquisition System for the Apple Macintosh—Part 2: Macintosh Programming the Easy Way, by John Eng, 15.

Tracking Soviet Television Satellites, by Mark Dahmke, 22.

A Network for distributed Control—Part 1—Building an RS-485 Network for Controllers, by Ed Nisley, 32.

CEBus: A New Standard in Home Automation—The First In-Depth Technical Description, by Ken Davidson, 40.

Circuit Cellar INK Design contest Winners, 54.

Silicon Update—Beyond ASICs: New-Generation PLDs' Cost and Flexibility Benefits, by Tom Cantrell, 57.

Firmware Furnace—Exposing the Unseeable: Peering deep into code with the help of a single strategic bit by, Ed Nisley, 62.

From the Bench—To Participate is to Win, by Jeff Bachiochi, 69.

Software by Design—Signal Smoothing: Taking the Rough Edges off of Real-World Data, by Jack Ganssle, 73.

ConnecTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 74.

Steve's Own INK—Don't Mess with Mother Nature, by Steve Ciarcia, 80.

ISSUE 11

Oct/Nov 1989

Theme: 32-BIT APPLICATIONS

Editor's INK—Why 32 bits?, by Curtis Franklin, Jr., 1.

Readers' INK—Letters to the Editor, 5.

New Product News, 8.

Visible INK—Letters to the INK Research Staff, 12.

INKnet—Part 2: Writing Software for Distributed Control, by Ed Nisley, 15.

An Intel 386SX-based PC/AT Compatible Motherboard—Part 1, by Daryl Rinaldi, 22

The BCCH16—Part 1, A 16-/32-bit Multitasking Single-Board Computer, by Tom Cantrell, 40.

Firmware Furnace—Cache Crazy, by Ed Nisley, 55.

From the Bench—Gentlemen Start Your Engines, by Jeff Bachiochi, 62

Silicon Update—Intel's Dark Horse—The 80960: A Powerful New Controller for Performance-Critical Applications, by Tom Cantrell, 68.

Software by Design—Algorithms for Trigonometric Functions, by Jack Ganssle, 73.

ConnecTime—Excerpts from the Circuit Cellar BBS conducted by Ken Davidson, 75.

Steve's Own INK—Those Dazzling 32-Bit Chips, by Steve Ciarcia, 80.

ISSUE 12

Dec 1989/Jan 1990

Theme: APPLICATIONS IN THE ARTS

Editor's INK—First Things First, by Curtis Franklin, Jr., 1.

Readers's INK—Letters to the Editor, 5.

New Product News, 8.

Visible INK—Letters to the INK Research Staff, 12

INKnet—Part 3: Writing Network Applications—The Subtle Art of Programming for INKnet, by Ed Nisley, 14.

Image Synthesis: A Tutorial—Tools for Drawing a New Universe, by Chris Ciarcia, 22.

An Intel 386SX-based PC/AT-Compatible Motherboard—Part 2, by Daryl Rinaldi, 37.

A Low-Cost MIDI Sequencer—Build an 8031-Based Stand-Alone MIDI Sequencer, by Winefred Washington, 49.

Firmware Furnace—Simulated Reality: Simulating Systems for 8051 Debugging, by Ed Nisley, 53.

From The Bench—The Versatile Light-Emitting Diode, by Jeff Bachiochi, 62.

Silicon Update—MAXIMUM Chips: Maximum Real-World Problem Solvers, by Tom Cantrell, 69.

Software by Design—Least-Squares Curve Fitting, by Jack Ganssle, 74.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 82.

Domestic Automation—New X-10—Compatible Products Hit the Market, 78.

Steve's Own INK—..And Everything in its Place, by Steve Ciarcia, 88.

ISSUE 13

Feb/Mar 1990

Theme: ANALOG SIGNAL PROCESSING

Editor's INK—Dateline: Las Vegas, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 5.

New Product News, 8.

Visible INK—Letters to the INK Research Staff, 12.

Building An IBM PC Keyboard Translator—An 8031-based System for Code Translation, by Bill Curlew, 14.

Building etude—Part 1: A 25-MHz Analog-to-Digital Converter for the PC Bus, by J. Conrad Hubert and Dick Hubert, 21.

Digital Signal Processing—Part 1: An Introduction, by Dean McConnell, 30.

The BCCH16—Part 2: Porting a Multitasking BASIC to the H16, by Jack Ganssle, 42.

Firmware Furnace—An Exercise for the Student: Building Software from the Ground Up, by Ed Nisley, 52.

From the Bench—ENTION...ATTENTION...ATTENTION...ATT—Building an LED Moving Message Display, by Jeff Bachiochi, 60.

Silicon Update—Earthshaking Chips: A report from the Second Microprocessor Forum, by Tom Cantrell, 68.

Software by Design—Memory Management on the HD64180, by Jack Ganssle, 72.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 76.

Steve's Own INK—An Analog State of Mind, by Steve Ciarcia, 80.

ISSUE 14

April/May 1990

Theme: APPLICATIONS IN LIGHT

Editor's INK—It Just Gets Better, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 6.

New Product News, 8.

Visible INK—Letters to the INK Research Staff, 12.

Build a Simple SCSI-to-Anything Interface—Take advantage of the Spec to Simplify Your Designs, by Jim MacArthur, 15.

Computer Generated Holograms, by Dale Nassar, 22.

Modulating Laser Diodes—The Search for the Perfect Driveway Sensor, by Steve Ciarcia, 38.

Digital Signal Processing—Part 2: DSP Applications with the TMS320C25, by Dean McDonnell, 48.

Firmware Furnace—BASIC Radioactive Randoms: True Random Numbers from Mother Nature, by Ed Nisley, 58.

From the Bench—Honey, I Shrunk the...: New Uses Abound for the Smallest AT Clone Yet, by Jeff Bachiochi, 70.

Silicon Update—Whither Zilog? A Roller Coaster on the Back of the Z80, by Tom Cantrell, 78.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 82.

Domestic Automation—CEBus Comes One Step Closer to Reality, by Ken Davidson, 85.

Steve's Own INK—The Home Computer Revolution is Over, by Steve Ciarcia, 88.

ISSUE 15

June/July 1990

Theme: ROBOTICS

Editor's INK—Applications for All, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 5.

New Product News, 8.

Visible INK—Letters to the INK Research Staff, 12.

Implementing a Comefrom Statement—Discover Where Your Code Has Been, by J. Conrad Hubert, 16.

Robotics and Artificial Intelligence—Modeling Synthetic Actors and Real-World Interactions, by Chris Ciarcia, 18.

Building Mitee Mouse III—Part 1: The Hardware for a Maze-Running Rodent, by David Otten, 32.

Building etude—Part 2: A 25-MHz Analog-to-Digital Converter for the PC Bus, by J. Conrad Hubert & Dick Hubert, 41.

Firmware Furnace—The Furnace Firmware Project: Process Control on the Home Front, by Ed Nisley, 49.

From the Bench—Power Control Basics: Choosing the Best Digital Power Control Option for Your Application, by Jeff Bachiochi, 57.

Silicon Update—Chips for Artificial Intelligence: I've Seen the Future—and It Is Fuzzy, by Tom Cantrell, 68.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 74.

Steve's Own INK—Contemplation, by Steve Ciarcia, 80.

SPECIAL BUILDING AUTOMATION SECTION

CEBus Update—How is the Health of EIA's Baby?, by Ken Davidson, S2.

Build a Low-Power Data Logger—Computerized Data Collector Runs for Years on a Battery, by Steve Ciarcia, S12.

Build a Power Frequency Monitor—Counting Cycles Until it Hertz, by Ed Nisley, S24.

ISSUE 16

Aug/Sept 1990

Theme: COMMUNICATIONS

Editor's INK—A Little Communicating, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 5.

New Product News, 12.

Image Compression for High-Speed Network Transmission, by Chris Ciarcia, 18.

Extended Serial Communications on the 8096—Increase the Utility of these Ubiquitous Chips With Simple C Software, by Alfred Schumer, 28.

ONDI—The On-line Device Interface: Building a Powerful Remote Control for Your PC, by John Dybowski, 34.

Building the Mitee Mouse III—Part 2: The Software for a Maze-Running Rodent, by David Otten, 40.

Huge Arrays On The HD64180—Taking Advantage of Memory Management, by Jack Ganssle, 53.

Firmware Furnace—The Furnace Firmware Project: Keypad and Piezo Beeper, by Ed Nisley, 56.

From the Bench—Creating a Non-Volatile RAM Module, by Jeff Bachiochi, 65.

Silicon Update—Old 8051s Never Die, They Just Get Smarter: New Power for a Controller Mainstay, by Tom Cantrell, 74.

Practical Algorithms—Getting to Know You: A New Feature Begins, by Scott Robert Ladd, 79.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 82.

Steve's Own INK—Flash or Splash?, by Steve Ciarcia, 88.

ISSUE 17

Oct/Nov 1990

Theme: GRAPHICS

Editor's INK—CASE is Coming, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 5.

New Product News, 10.

Functions of Complex Variables—Generating Biomorphs on Personal Computers, by Saim Ural, 16.

Creating Fractal Images—Using the Power of Fractals for Realistic Planetary Images, by Chris Ciarcia, 24.

Running VGA on an IBM Professional Graphics Display, by J. Conrad Hubert, 38.

Firmware Furnace—The Furnace Firmware Project: Tight Code Meets the C Monster, by Ed Nisley, 73.

From the Bench—PC Programming Comes to Embedded Control: V25...An 8088 With All the Good Stuff, by Jeff Bachiochi, 82.

Silicon Update—VHDL: The End of Hardware?, by Tom Cantrell, 89.

Practical Algorithms—Around and Around We Go..., by Scott Robert Ladd, 98.

The Second Circuit Cellar INK Design Contest Winners, 100.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 104.

Steve's Own INK—A Computer is A Computer, by Steve Ciarcia, 112.

EMBEDDED APPLICATIONS SECTION

Multichannel Digital Voltmeter Interface—MAX134 Chip Adds High-Performance ADC to Embedded Control, by Steve Ciarcia, 43.

Control Theory for Embedded Controllers—An Introduction to the Basics of Computerized Control, by Thomas Mosteller, 58.

Using C for Embedded Control—Building a 6805-Based Darkroom Timer, by Ashok Patel & Walter Banks, 67.

ISSUE 18

Dec 1990/Jan 1991

Theme: CONTROL SOFTWARE

Editor's INK—I've Seen the Future, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 4.

New Product News, 8.

ONDI—The On-line Device Interface—Part 2: Software for Remote PC Control, by John Dybowski, 12.

Principles of PC-Based Data Acquisition and Control Systems, by Chris Ciarcia, 18.

An Interface for Portable Battery-Backed RAM—Using the Mitsubishi BEE Card for Non-volatile Data Storage, by Tim McDonough & Bruce Webb, 32.

Using the Motorola MC68HC11—A Venerable History and a Certain Future, by Steve Ciarcia & Burt Brown, 36.

Designing with Flash Memory—Is There a New Alternative to EEPROM and SRAM?, by Marcus A. Levy, 50.

Firmware Furnace—ANSI Controls and Fixed Points: The Furnace Firmware Project Continues, by Ed Nisley, 61.

From the Bench—Magnetic Levitation: An Example in Closed-Loop Control—How to Defy Gravity Without the Use of Black Magic, by Jeff Bachiochi, 71.

Silicon Update—Goodbye CRT, Hello LCD, by Tom Cantrell, 79.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 88.

Steve's Own INK—The Whole Job, by Steve Ciarcia, 96.

ISSUE 19

Feb/March 1991

Theme: DIGITAL SIGNAL PROCESSING

Editor's INK—What a Difference, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 5.

New Product News, 8.

DSP Architectures for Signal Processing Applications—Matching the Tools to the Job, by Bill Schweber, 12.

A PC Stopwatch—Improved Timing for Acquisition and Control, by David P. Schulze, 22.

Digital Image Processing—Software-based Digital Signal Processing, by Chris Ciarcia, 24.

Mini-DSP—A Digital Signal Processor Experimentation Unit, by Steven E. Reyer, 38.

Analog Circuit Design—Stripping Away the Mystery for Digital Designers, by Mark E. Nurczyk, 46.

Firmware Furnace—It's Just You and the CPU: Intel 80x86 Instruction Timings, by Ed Nisley, 74.

From the Bench—Multidrop A/D and D/A Network: Using Your PC's Printer Port and Four-Conductor Phone Cable, by Jeff Bachiochi, 82.

Silicon Update—Hot Chips in the Summertime: A Report from "Hot Chips II", by Tom Cantrell, 93.

Practical Algorithms—Making Hash: A Table Built for Speed, by Scott Robert Ladd, 100.

Domestic Automation—CEBus Gets Physical—The Standard Takes Two More Steps to Maturity, by Ken Davidson, 103.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 105.

Steve's Own INK—The Sophomore Slump, by Steve Ciarcia, 112.

COMPILERS FOR THE 8051 SECTION

Oh Say, Can You C?—Circuit Cellar INK Evaluates Three C Compilers for the 8051, by M. Scott Martin, Tim McDonough, & Curtis Franklin, Jr., 58.

High-level Languages for Microcontrollers—Don't Believe the Hype, by Ed Nisley, 69.

Using High-Level Languages on Embedded Controllers, by Ken Davidson, 72.

ISSUE 20

April/May 1991

Theme: PORTABLE APPLICATIONS

Editor's INK—Towards More Personal Computing, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 5.

New Product News, 8.

A MIDI-Controlled Sampled-Sound Player, by Tom Dahlin & Don Krantz, 14.

A Portable 8051-Based DRAM Tester—Designing Maximum Features into Minimum Space, by John Wettroth, 24.

Using the T174 For Data Acquisition—Low-Cost BASIC I/O, by Ed Vogel, 41.

The Mystery of Intel Hex Format—Exorcising the Hex Demon, by Ed Nisley, 45.

Firmware Furnace—You Can't Do That!: A Look at Porting Code from OS/2 to DOS, by Ed Nisley, 50.

Silicon Update—Pixie Power—A Switch + LCD Combo for Intelligent I/O, by Tom Cantrell, 57.

Practical Algorithms—Adjusting Standard Deviation to Sample Size: Increased Reliability for BASIC Statistics, by Charles P. Boegli, 63.

A PC-Controlled Light Show—A Parallel-Communication Lighting Board with MIDI Potential, by R. Scott Coppersmith, 79.

Working with Zeropower SRAM—Building ZMEM, the Zeropower Memory Chip Programmer, by Ernest Stiltner, 84.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 86.

Steve's Own INK—Why Portable?, by Steve Ciarcia, 96.

AUTOROUTERS SECTION

From the Bench—Working with an Autorouter: Integrating a New Tool into an Established Engineering Routine, by Jeff Bachiochi, 66.

Bringing in the Pros—Working with a Board Design Firm, by Curtis Franklin, Jr., 71.

ISSUE 21

June/July 1991

Theme: COMMUNICATIONS

Editor's INK—Home, But Not Alone, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 4.

New Product News, 8.

S-ARTnet—A Powerful Controller Network: Designing a Low-Cost Network Around S-ART, by John Dybowski, 14.

Software at the Hardware Level—Programming TSRs for Interrupt Handling, by Chris Ciarcia, 26.

A Simple RS-485 Network—Exploit the Nine-Bit Serial Communication Modes of the 8051, 8096BH, 68HC11, 68HC05, and Z180 Microcontroller Families, by Jim Butler, 38.

Interfacing Microsoft's Flash File System—Using Flash Memory Under MS-DOS, by Markus Levy, 44.

Firmware Furnace—The Furnace Firmware Project Concludes: Hard Data for Home Control, by Ed Nisley, 78.

From the Bench—IR Communications: An Essential Link in the Chain of Control, by Jeff Bachiochi, 86.

Silicon Update—The MC68HC16: Stretching 8 Bits to the Limit, by Tom Cantrell, 90.

Practical Algorithms—Filtering Sampled Signals: Software DSP, by Charles P. Boegli, 98.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 102.

Steve's Own INK—Reach Out..., by Steve Ciarcia, 112.

HOME AUTOMATION SECTION

Touch-tone Interactive Monitor—A Watchdog in Every Home, by Steve Ciarcia, 54.

CEBus Update: More Physical Details Available, by Ken Davidson, 66.

Echelon's Local Operating Network—The Year of the LON?, by Ken Davidson, 74.

ISSUE 22

Aug/Sept 1991

Theme: EMBEDDED APPLICATIONS

Editor's INK—The March of Technology, by Curtis Franklin, Jr., 1.

Reader's INK—Letters to the Editor, 4.

New Product News, 8.

Using Device Drivers To Change the Rules, by Chris Ciarcia, 14.

ISDN (S/T) Interface—General Review of Functional Concepts, by Steven E. Strauss & P.K. Govind, 26.

S-ART: Building The Network Software—Part 2, by John Dybowski, 32.

Numerical Applications Using DSP—Using a DSP Chip for High-Speed Numeric Processing, by Eduardo Pérez & Dapang Chen, 60.

Firmware Furnace—Toolmaker's Tools, by Ed Nisley, 74.

From the Bench—Reducing Power Consumption: Breathing new life into Data Logging, by Jeff Bachiochi, 81.

Silicon Update—Kynar To The Rescue: The Ultimate Sensor?, by Tom Cantrell, 88.

Practical Algorithms—Summarizing Your Data: Properties of a Bounded Probability Density Function, by Charles P. Boegli, 95.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 104.

Steve's Own INK—A Standard Column, by Steve Ciarcia, 112.

EMULATORS & SIMULATORS SECTION

But It Worked With My Emulator!—Why Emulation isn't Reality, by Keith Wentworth, 42.

Son Of DDT: A New 8031 Debugger, by Ed Nisley, 49.

ISSUE 23

Oct/Nov 1991

Theme: GRAPHICS & VIDEO

Editor's INK—English: The Forgotten Language?, by Ken Davidson, 1.

Reader's INK—Letters to the Editor, 4.

New Product News, 10.

A Video Editing Control System—Part 1: The Hardware, by William J. Kressbach, 16.

Computer Graphics And The World of Scientific Visualization, by Chris Ciarcia, 26.

Add A Video Display To Your 8031 Microcontroller—Graphics and Color Liven Up Any Output, by Larry Duarte, 40.

ISDN (S/T) Interface—Part 2: Design Example of a PC Plug-in Board, by Steven E. Strauss & P.K. Govind, 46.

Firmware Furnace—(Re-) Starting C, by Ed Nisley, 70.

From the Bench—Redefining Remote Control: Now You See 'Em—Beep—Now You Don't, by Jeff Bachiochi, 79.

Silicon Update—Nuts About RISC: Go on a Low-Fat Acorn Diet, by Tom Cantrell, 86.

Practical Algorithms—Measuring Subjective Sound Levels, by Charles P. Boegli, 94.

ConnectTime—Excerpts from the Circuit Cellar BBS, conducted by Ken Davidson, 103.
